About the project

The conversion of an old hotel into new residential apartments in St. Paul's Bay is poised to become a standout addition to the area, offering modern living spaces that prioritize comfort, style, and practicality.

The development features a total of 9 floor levels, with 8 floors dedicated to accommodate 30 residential units, including 27 contemporary apartments and 3 luxurious penthouses.

One of the most notable aspects of this project is the stunning sea views available from the apartments situated on the 5th floor and above.
